Please give Public Works a call with any questions or concerns at 801-614-0870, M-F 7am-3 pm. Thank You!

STORM WATER 101

Clean wetlands and healthy streams are important to Clinton City. The water from parking lots, driveways, and streets flow into the storm drain which goes untreated into the streams, wetlands, and eventually enters the Great Salt Lake. Pollution entering the storm drain makes the waterways unsafe for people and wildlife. Following the management practices below will help prevent pollution. Please comply with these regulations to protect public health.

Draining a Pool or Spa

Only drain a pool or spa when chlorine levels are very low, not detected by a chlorine test kit (less than 0.019 mg/l). Re-use the water for landscaped areas whenever possible; avoid allowing the water to drain onto neighboring properties. Otherwise, drain to the sanitary sewer system in coordination with the North Davis Sewer District 801- 825-0712. If the above options are not feasible, drain only clean pool water to the storm drain (or curb and gutter) that has been de-chlorinated and when chlorine is not detected with a test kit. Algaecides: Avoid copper-based algaecides such as copper sulfate; even a lower concentration can be a mild irritant to humans and is fatal to fish!

The sanitary sewer system takes wastewater to a treatment plant where it is treated before continuing to the Great Salt Lake. Much of the storm drain water also flows to the Great Salt Lake, but is NEVER treated.
